Snipp Dogg is a Visual Studio.NET (C#, VB.NET, ASP.NET, PHP, Java, Objective C, Swift, etc.) snippet utility that allows you to create a snippet from any line of source code within a Visual Studio or Visual Studio Team System project. Snipp Dogg comes with a large list of pre-defined snippets that you can use right out of the box. You can also create your own snippets from any line of source code within a Visual Studio project. Snipp Dogg has a number of powerful editing features that allow you to generate correct, style and snippet-aware snippets from any code. Once you have created your snippet, you can add it to your Visual Studio Toolbox, adding a snippet button to your toolbar, giving you the option to quickly and easily use the snippet every time you type a function call. It even works in Visual Studio 2012! Features Snipp Dogg will allow you to create pre-defined snippets and customized snippets. Snippets are generally defined by a two part name. First part must be the identifier of the function/method. Second part must be the name of the member variable. Snippets can be created from any line of code, one by one or from an entire method/class. Snippets can be grouped together in an entire collection and the collection can be saved as a preset. Snippets can be exported to your local computer or to an online server for sharing with other Visual Studio.NET developers. Snippet's can be exported to SharePoint 2007, 2010 or 2013 and can be used as templates in Visual Studio 2012. All snippets can be grouped by projects and all projects by solutions. Snippets can be assigned to standard type of tabs in Visual Studio such as Help, Snippets, Dialog, Documents, and Solution Explorer. Snippets can be assigned to standard type of menus in Visual Studio such as File, View, Edit, Tools, Options, and Help. Snippets can be assigned to a custom type of menus in Visual Studio such as Tools|Snippet Manager|File Associations. Snippets can be assigned to standard type of menus in Visual Studio Team System such as Build, Test, Team, Properties, etc. Snippets can be assigned to custom type of menus in Visual Studio Team System such as Build|Snippets|Edit Snippet. Snippets can be

What's New in the Snipp Dogg?

This application was developed as a snippet editor for use with Visual Studio 2005. Snipp Dogg provides an easy way to create and manage code snippets that can be easily reused and customized for individual tasks or development teams. I also added a keyboard shortcut for use when editing snippets.
